PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience building and shipping production web and mobile applications with React, Next.js, Node.js, TypeScript, PostgreSQL, and MongoDB. Experienced across the full delivery cycle: REST API design, relational and NoSQL data modelling, third-party integrations (Stripe, Square, QuickBooks, CharmHealth EHR, AWS S3), and production deployment. Shipped a cross-platform React Native and Expo app to both the App Store and Google Play. Comfortable owning features end to end in Agile teams alongside UX, backend, and QA.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, C#, SQL, HTML5, CSS3, SCSS

Frontend: React 19, Next.js (App Router, SSR/SSG), Redux, Vite, Tailwind CSS, Material UI, Ant Design, shadcn/ui, Bootstrap, Responsive Design

Mobile: React Native, Expo, TypeScript, cross-platform iOS and Android delivery, App Store and Google Play releases, deep links and universal links, offline-tolerant live data

Backend: Node.js, Express, NestJS, Laravel, REST API design, JWT authentication, RBAC, microservices, webhooks, WordPress (ACF)

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, Prisma, Sequelize, Mongoose

Integrations & AI: Google Gemini text, vision, and image-generation APIs, Stripe (checkout, subscriptions, billing), Square, QuickBooks Online, CharmHealth EHR, Printify, Twilio/SMS, Nodemailer

Cloud & DevOps: AWS (S3, EC2), Vercel, Git/GitHub, CI/CD, DNS and domain configuration, email infrastructure, Cloudflare, error monitoring

Practices: Agile/Scrum, code review, SEO and Core Web Vitals optimization, cross-browser development, performance optimization

PROFESSIONAL EXPERIENCE

Softnox Technologies - Senior Full-Stack Engineer

Karachi, Pakistan | June 2023 - Present

- Design and build custom web applications with React.js, Node.js, TypeScript, and MongoDB.
- Develop and maintain REST APIs and scalable microservices using Node.js and Express.js.
- Translate design mockups into reusable React components styled with SCSS and Tailwind CSS.
- Participate in database design, implementation, and query optimization on MongoDB.
- Collaborate with UX and backend teams in an Agile environment with daily standups and sprint delivery.

AxeCorp Technologies - Full-Stack Engineer

Karachi, Pakistan | March 2022 - June 2023

- Built user interfaces and backend services for multiple client projects on the MERN stack.
- Designed and developed REST APIs with Node.js and Express.js, integrating them with React frontends.
- Improved code reusability and rendering efficiency across shared React component libraries.
- Debugged and refactored legacy codebases to reduce defects and improve maintainability.

TexvnX - Frontend Developer

Karachi, Pakistan | March 2021 - February 2022

- Built responsive user interfaces and state management with React.js, HTML, CSS, and JavaScript.
- Consumed and implemented REST APIs, ensuring reliable frontend-backend integration.
- Contributed backend work using Node.js, Express.js, and MongoDB.

SELECTED PROJECTS

CueLogic - Billiards Tournament Platform & Mobile Scorekeeper

cuelogic.app | [iOS App Store](https://apps.apple.com/pk/app/cue-logic/id644888888) | [Google Play](https://play.google.com/store/apps/details?id=com.cuelogic)

- Built and deployed a full-stack tournament platform using React 19, Vite, Tailwind CSS, Node.js, Express, Prisma, and PostgreSQL.
- Implemented single-elimination, double-elimination, and round-robin engines with automated bracket generation, scheduling, byes, live scoring, dispute handling, and ELO rankings.
- Delivered role-based organizer, player, and super-admin experiences with team registration, venue and table management, Stripe billing, SMS/email messaging, and analytics.
- Shipped a companion mobile app to the App Store and Google Play with Expo 57, React Native 0.86, and TypeScript, including deep links, live match dashboards, and pinch-to-zoom venue maps.

OutfitIQ - AI Personal Styling & Wardrobe Assistant

outfit-iq-ai.vercel.app

- Built and deployed a Next.js 15, React, and TypeScript application generating personalized outfit, color-palette, and makeup recommendations from occasion, skin tone, and garment preferences.
- Integrated Google Gemini text and vision models for multimodal wardrobe analysis: validating uploaded clothing images, identifying garments, colors, and textures, and returning structured styling advice.
- Used Gemini 2.5 Flash Image for generative multi-look fashion visuals with prompt variation, retries, timeouts, and graceful fallbacks.
- Combined AI output with a deterministic rule-based recommendation engine and MongoDB/Mongoose persistence, plus client-side image compression, favorites, and look comparison.

Zelos Foundation - Financial Literacy & Mentorship Platform

zelosfoundation.org

- Built a nonprofit learning and community platform with Next.js 16 App Router, React 19, TypeScript, Tailwind CSS, Ant Design, MongoDB, and Mongoose.
- Implemented JWT authentication with HTTP-only cookies, email verification, password recovery, and role/permission-based access for mentees, families, schools, moderators, and admins.
- Developed audience- and school-scoped content libraries with drip unlocking, completion tracking, subscriptions, school licensing, seat limits, and invitation workflows.
- Integrated Stripe checkout, subscriptions, promo codes, and gift cards with Printify fulfilment and AWS S3 media uploads, plus admin dashboards and analytics.

Texas Center Wellness - Healthcare Booking Platform

texascenterwellness.com

- Built a responsive healthcare site with Next.js 15 App Router, React 19, TypeScript, and Tailwind CSS covering services, providers, blog, and scheduling.
- Integrated CharmHealth EHR for provider availability, patient creation, questionnaires, and appointment booking, rescheduling, and cancellation.
- Integrated Square payments/refunds and QuickBooks Online OAuth with invoices, webhooks, and automated token refresh, backed by Express 5 APIs on MySQL/Sequelize.
- Delivered SEO work including dynamic metadata, LocalBusiness/Article structured data, canonical tags, generated sitemaps, and Google Analytics.

Gofer Assistants - Service Marketplace

goferassistants.com

- Built a marketplace connecting customers with freelance assistants for pet care, cleaning, and home services.
- Developed secure Laravel (PHP) REST APIs for authentication, service listings, bookings, and payments over a MySQL relational schema.
- Integrated Stripe for booking charges and payouts, and shipped an admin panel plus production deployment with payment webhooks and email notifications.

EDUCATION

Bachelor of Science in Computer Science

Karachi Institute of Economics and Technology (PAF-KIET), Karachi, Pakistan | 2020 - 2024
